

Accra Technical University

Hostel Booking Management System — Sample Prospectus

Academic demonstration document for Group 13 (Diploma in Information Technology). Not an official ATU publication. Figures and rules are illustrative.

1. Purpose

This sample prospectus summarises how students request accommodation through the HBMS platform: search hostels, request a room, await manager approval, submit Mobile Money (simulated), and download a receipt.

2. Who may apply

Registered ATU students with a valid student ID, active account, and accepted platform rules. Managers control rooms for one hostel; administrators oversee all hostels.

3. Academic session & fees

Rooms are priced **per academic year / session** (e.g. 2026/2027), not per night. Demo fees range approximately GH₵ 3,500 – 6,000 depending on room type and hostel.

Item	Demo illustration
Session	2026/2027
Room types	Single, Double, Shared
Payment	Simulated MoMo (MTN / Vodafone / AirtelTigo)
Confirmation	After manager approval + verified payment

4. Booking rules (sample)

- A booking is a **request** until a manager approves it.
- Capacity is enforced: beds = room capacity – confirmed bookings (no double allocation).
- Payment amount is taken from the booking record, never from the browser.
- Mock gateway — no real money moves in this academic demo.
- Students should read the disclaimer and privacy notice before requesting a room.

5. Documents & contacts

In the live system: search on the student home page, open a hostel detail page for rooms, request booking, track status under **My bookings**. Demo admin: admin@atu.edu.gh / password. Legal pages: /disclaimer and /privacy.
